NOBILISS. AMPLISS. DOMINIS
REIPUB: NORIBERGENSIS SENATORIBUS
PRUDENTISS. DOMINIS
MEIS OBSERVANTISS.

Rerum, quæ sub hoc universo continentur, siue eæ sint ex censu animatarum, siue inanimatarum, terrestrium siue aquatilium, rariorum quidem & passim & ubique non occurrentium admiratio me à teneris tenuit, adeoque fodicavit, ut iis colligendis jam dudum animum adjecerim. Videbatur & studium atq; professio mea ab hoc non tantum non abludere neq; abhorreere, sed verò id impendio exigere: Si enim cuius scientiæ vel artis suæ subjectum familiariter cognitum habere, necessariò incumbit: quidni & mihi simplicia siue pharmaca ingredientia, cujusmodi rariora illa ut plurimum sunt, domesticè nota esse debent? In animum verò nunquam induxi meum, neque etiam hoc à me impetrâssem unquam, ut istarum quidquid est quisquiliarum à me pedetentim collectum, velut theatropublico destinarem atq; exhiberem, horum temporum & morum non ignarus, quibus, sat scio, hoc opusculum non ut Phidia signum primo statim adspectu omnium subfragiis probatum iri, sed fore, quorum alii me Phaethonta viribus meis majora tentâsse, & humeris graviora suscepisse: alii Ardelionum pennas nido majores extendisse, & ultra septa transilisse: alii Morrychum domesticorum negotiorum negligentem, aliena tractâsse: alii Suffenum sibi ipsi blanditum & stultè se admiratum esse: alii Bibulum laureolam in mustaceis quæsisse, & ex nauci & frivolis rebus ineptè gloriam captâsse: alii deniq; dicturi sint, me ad gentiles & adgnatos deducendum, quòd mihi non melius sapiam, sed pecuniam hanc in rem impensam temerè prodigam: Nisi mihi alia prorsus infudisset ratio, vindicanda scilicet ab interitu ejusmodi

ejusmodi esse, si non ipsâ re, ære tamen; Me tamen meo pede ac modulo ante omnia mensus, & emensus fui, me absq̃, jactura rerum & dierum horulis aliquot subsecivis, & seriis negotiis subtractis, id quidquid est rei Chalcographo sub manus & incudem q. dare posse. Et si aliis ut volupe, ita integrum atque concessum est, in alias res ludicras, interdum parum vel minimè honestas, sua prodigaliter profundere, quidni mihi sumpserim, vel tantum hanc in rem insumere? Nec est, si vel maximè mei amator & admirator essem (quod tamen à me maximè alienum esse nôrunt, qui me nôrunt) ut ex tantillo negotio aliquid laudis vel gloriæ, quæ non nisi ex magnis & arduis surgere, eaque comitari didicit, sperem; quidquid verò ejus sit, ut chypeus, quot caput contra ejusmodi Momorum, Zoilorum & Theonum tela & morsus obmuniam & defendam, suppetat. En Vobis, Patres Patriæ perpetuò Pii, Fasciculum hunc, qualis qualis etiam & quantulus sit, totum mancipio, spe fretus certâ à Vobis non solum illum, sed & me, meaque omnia, ut hætenus, ita deinceps contra omnem calumniam & injuriam assertum atque defensum iri: DEUS Opt: Max: Vos, Patres Conscripti, patriæ commodo & bono diu multumque incolumes & conservet & protegat. Dabam Noribergæ 6. Aug: Anno clō lōc XVI.
